Lou Chang

Software Engineer | Cloud Infrastructure, Terraform & CI/CD

Toronto, ON, Canada

Email: louchang@loustack.dev | **Website:** loustack.dev | **GitHub:** loustack17 | **LinkedIn:** lou-chang

Summary

Software engineer with 5+ years supporting production web systems across cloud infrastructure, CI/CD, Linux, and databases. Recent work includes Terraform-managed AWS/GCP delivery, GitHub Actions identity, and a GitOps-managed Kubernetes foundation for an AI-platform portfolio. Earlier work includes CTBC Bank GitLab and Cathay Financial Holdings AWS environments.

Experience

Cloud Infrastructure & Backend Engineer (Contract) — Toronto, ON

Independent Consulting — **Sep. 2024 - Present**

- **AWS infrastructure -** Built Terraform-managed AWS infrastructure with EC2, S3 remote state, IAM/OIDC, Docker Compose, GHCR, and CloudWatch health/log checks.
- **GCP deployment -** Moved an AWS EC2/NGINX deployment to Cloud Run, Cloud SQL, Artifact Registry, and Secret Manager; separated dev/prod resources and added managed SSL and monitoring.
- **CI/CD identity -** Changed GitHub Actions from AWS OIDC to GCP Workload Identity Federation, moved sensitive configuration to Secret Manager, tightened IAM, and added branch/ref/concurrency controls.

Web Development Engineer — Taipei, Taiwan

Duotify Inc. — **Jun. 2020 - Jan. 2024**

Maintained about 12-14 client projects concurrently and worked across 20+ over the role. The examples below are selected, separate client systems.

- **Cathay Financial Holdings internal platform -** Built the company's first AWS dev/test environment for a 40-50 API .NET 5 system with IAM, EC2, S3, RDS, Lambda, and SAM CLI; enabled local verification without client VPN access and delivered 4-5 APIs through on-site acceptance.
- **CTBC Bank GitLab platform -** Maintained GitLab CE for 100-150 engineers across Linux, Windows, macOS, and mobile runners; built a production-like upgrade test environment and automated log cleanup and routine maintenance with Bash and Cron.
- **Top-three Taiwan used-car marketplace -** Helped restore service during a week-long traffic/scraper incident (50-70k monthly visits) by tracing App Service saturation in Azure Monitor and configuring autoscaling while the team rerouted traffic.

ERP Applications Engineer — Taipei, Taiwan

Unitech Computer Co., Ltd. — **Mar. 2019 - May 2020**

- **B2B and legacy systems -** Maintained a nationwide ordering platform and legacy accounting system across ASP.NET MVC/AngularJS, SQL Server, PostgreSQL, and Oracle; fixed production defects and data-query issues.

Selected Project

AI Platform Portfolio | GCP, Kubernetes & GitOps

Built a GitOps-managed Kubernetes foundation on GCP with Terraform/OpenTofu, Workload Identity Federation, GitHub Actions, Argo CD, traceable image tags, and Kubernetes failure modeling.

Education & Certification

Seneca Polytechnic — Toronto, Canada

Diploma, Computer Programming — **Aug. 2025**

Hwa Hsia University of Technology — New Taipei City, Taiwan

Bachelor's, Information Management — **Jun. 2020**

Microsoft — Taipei, Taiwan

AZ-900: Azure Fundamentals — **Feb. 2022**

Technologies

Cloud & IaC	AWS, EC2, S3, RDS, Terraform/OpenTofu, GCP, Cloud Run, Cloud SQL
CI/CD & GitOps	GitHub Actions, Workload Identity Federation, GitLab CE/CI, Argo CD
Systems & Ops	Kubernetes, Docker, Docker Compose, Linux, Bash, Cron, CloudWatch, Azure Monitor
